

A Contribution to the Knowledge of the Wolf Spiders (Araneae: Lycosidae) of Albania

*Gergin Blagoev*¹

Abstract: Twenty-one species of wolf spiders (Lycosidae) have been established from 29 collecting sites (0-2550 m a.s.l.) in Albania. Sixteen species are new to the spider fauna of this country. Taxonomic remarks and illustrations for the species *Pardosa atomaria* (C. L. Koch, 1839) and *Pardosa cribrata* (L. Koch, 1866) are presented.

Key words: wolf spiders, Araneae, Lycosidae, Albania.
