

On Some Little Known and New Uropodina Species (Acari: Mesostigmata) from Croatia, Serbia-Montenegro, Slovenia and Macedonia

*Jenő Kontschán*¹

Abstract: Nineteen Uropodina species were collected in several parts of former Yugoslavia (Croatia, Serbia-Montenegro, Slovenia and Macedonia). These are the first records of the species. Three of them (*Trachytes papukiensis*, *Trachytes macedoniensis*, *Uropoda mazsalakiae*) are new to science. With 12 figures.

Key words: Uropodina, Acari, new species, faunistics, Croatia, Serbia-Montenegro, Slovenia and Macedonia
