

New Records of Some Herpetofauna Species in Bulgaria

Borislav Y. Naumov

Abstract: This paper announces 68 new localities of 25 species of amphibians and reptiles in Bulgaria. Representatives of the following families are included: Salamandridae, Bufonidae, Hylidae, Ranidae, Emydidae, Testudinidae, Scincidae, Anguidae, Lacertidae, Colubridae and Viperidae. Altitude and UTM-coordinates on the 10-kilometer grid are provided for all localities.

Key words: Amphibia, Reptilia, distribution, Bulgaria.
