Abstract: The species *Agardhiella parreysii* (L. Pfeiffer 1884) from the first sure locality in Bulgaria was reported. It was registered on the south slope of Sarnena Sredna Gora Mountain, north-west from Stara Zagora Town (Southern Bulgaria). We made a synopsis of the whole literature for the species from the genus *Agardhiella* in Bulgaria. Some original data on their distribution, ecology, taxonomy and origin were also represented. As a result of our study the exact number of species from the genus rises from three to four in the country.
