Abstract: A total of 64 species from 19 families were found in two sites. Sixty-two species are new for the spider fauna of the maquis forests in SW Bulgaria, seven from which are new also for the Bulgarian fauna. The species *Brommella falcigera* (BALOGH, 1935) and *Mesiotelus cyprius scopensis* DRENSKY, 1935 are discussed in taxonomic respect. New illustrations are also presented.

Key words: spiders, taxonomy, maquis forests, SW Bulgaria
