Abstract: All taxa of the tribe Pogonocherini in Turkey are evaluated and summarized with zoogeographical remarks and analysis. Ten species are established, belonging to two genera: 1 to *Parmenopsis* and 9 to *Pogonocherus*. A new record, *Pogonocherus eugeniae* is presented for Turkey. Some new faunistical data of some species are also given.

Key words: *Pogonocherus*, *Parmenopsis*, Pogonocherini, Lamiinae, Cerambycidae, Coleoptera, Turkey, *P. eugeniae*
